Here's some helpful tips on preparing for a power cut:

Keep a note of important numbers – including the 105 power cut number.

Charge your mobile phone and any power banks/battery packs in advance.

Keep a non-digital phone you can plug in handy as these work without electricity.

Keep a torch and batteries within easy reach.

A battery-operated FM radio is useful for news updates and weather reports.

If you have an electric car, make sure it's charged.
